TECHNICAL SKILLS

HTML	GitHub
CSS	SASS
JavaScript	jQuery
Ruby	Rails
Adobe Photoshop	Adobe Illustrator

PROJECTS

Gif lab -
A typing text gif generator using Canvas, JavaScript, Ruby and ImageMagick. Using the keyup event listener each character creates a snapshot/png which is then translated in ImageMagick to a .gif. This allows for backspaces to be recorded to demonstrate thought behind what is written to invoke emotion beyond photo gifs.

Microblog -
Created a twitter clone with Sinatra and JavaScript. Included the fundamentals of creating and deleting posts/comments as well as the sign-in/sign-up functionality.

GitHub side project -
Used Ruby on Rails to create a cheatsheet to share on GitHub demonstrating steps in natural language to create a Rails blog with Devise gem for login capabilities. Complete step-by-step instructions including extensive pseudo code.

Mixr -
A novelty cocktail app implementing JavaScript, jQuery and CSS animations to display user selection.

EDUCATION

2007-2010
Arizona State University
BS Human Development
Minor in Art History
